

be warned
... earlier

“if only we knew...”

Sentient**Alert** uses state of the art technology to predict potential problems with profound accuracy, eliminating costly plant outages and allowing the foresight to make better decisions.

Sentient**Alert**

Achieve increased performance and profitability with SentientAlert

Earlier Warnings

SentientAlert has a higher degree of precision and provides earlier warnings of problems than other early warning methods.

Problem identification and rectification

SentientAlert can identify the cause of a problem and generally provide advice on how to fix it.

Improved return on Investment

SentientAlert helps you make better decisions proactively. Its unique predictive technology alerts you in advance to unexpected deviations from normal operations and helps you optimise the use of your infrastructure.

Save money, see improved performance, feel peace of mind

Better information

SentientAlert helps you to make better decisions through accurate, timely and understandable information. Early warning of potential problems avoids costly plant outages.

Proactive

Be proactive using the real time nature of SentientAlert technology. Avoid problems before they occur.

Higher profitability

Achieve increased return on investment, reduce the impact of staff turnover and get feedback on plant performance. Savings of \$250,000 to \$500,000 have been obtained through this technology by the early detection of equipment failure.

The technology and people behind the claim

Sentient**Alert** has been built using our showcase technology, SentientSystem™. Sentient**Alert** can be integrated into your existing system or installed with other components from the SentientSystem range. In recognition of our achievements in the field of technology, SentientSystem was accredited to the Australian Technology Showcase in  2001 and again in 2007.

Syngenco's people and our technologies operate at the coalface in various industries across the globe. We are world specialists in information intensive systems and our Sentient**Alert** technology leads the way in early warning system technology.

Who is using our technology?

Billions of dollars of assets worldwide are being managed by Syngenco's SentientSystem technology.

The payback period

The benefits of using our technology are immediate and quantifiable. Our clients experience payback periods ranging from 6 to 18 months. Sentient**Alert** effectively pays for itself.

*Sentient**Alert** is world leading technology providing the most advanced framework yet for the early detection of abnormal plant operations and equipment faults.*
